

Transform in 6 Months

The Top 1% Engineer Program

Master Full-Stack Development. Real Enterprise Projects. AI-Powered Learning.

- 6 Months Intensive
- 10L+ Target Salary
- 1:1 Personalized Mentorship
- 100% Hands-On Projects

Why Now?

The software engineering market is hotter than ever. Companies are desperate to hire top talent who can ship production code, lead teams, and impact business outcomes. The salary ceiling for engineers has never been higher — and it's only climbing.

"The global software developer shortage will create 1M+ unfilled roles by 2025. Average senior engineer salary has reached ₹40L+ in India."

Yet most engineers graduate unprepared. They lack real-world experience, project portfolios, and the confidence to navigate interviews. This program closes that gap.

About This Program

The Top 1% Engineer Program is designed by Ex-Zoho architects and startup founders who've shipped products at scale. It's not another coding bootcamp. It's a professional transformation — 6 months of deliberate practice with real enterprise projects, AI-assisted development, and 1:1 guidance from mentors who've been there.

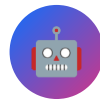

You'll build a production-grade GitHub portfolio, ship 4+ real projects, master Data Structures and Algorithms, and emerge interview-ready for roles paying ₹10L+.

Program Highlights

Real Enterprise Projects

Build 4 production-grade applications every month. No toy projects.

AI-Assisted Development

Master GitHub Copilot, Claude, and modern AI coding tools from Day 1.

Complete DSA Mastery

450+ LeetCode-style problems. Interview patterns. Mock interviews.

1:1 Personalized Mentorship

Weekly 1-hour sessions with engineers from Zoho, Amazon, and startups.

This Program is Ideal For

Who Should Join?

- ✓ Final-Year Engineering Students
- ✓ Career Switchers to Tech
- ✓ Self-Motivated Professionals
- ✓ CS/IT/MCA Graduates
- ✓ 1-3 Years Coding Experience
- ✓ Anyone Seeking 10L+ Role

6-Month Curriculum

Month 1: Foundations

Git, GitHub, System Design Basics, Professional Communication

Month 2: Backend Mastery

Databases, APIs, Scalability, Caching, Authentication

Month 3: AI & Modern Stack

AI-Assisted Development, Prompt Engineering, Modern Frameworks

Month 4: Enterprise Project

Full Product Cycle. From Requirements to Production Deployment.

Month 5: DSA Mastery

450+ Problems, Interview Patterns, Live Coding Sessions

Month 6: Career Launch

Resume, Mock Interviews, Negotiation, Job Placement Support

You Will Master

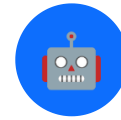

Production-Grade Code

Write code that ships. Learn testing, CI/CD, monitoring, and debugging at scale.

System Design

Design scalable systems. Understand databases, caching, microservices.

AI-Powered Development

Use AI tools to code 3x faster. Master GitHub Copilot and LLM APIs.

Data Structures & Algorithms

450+ practice problems. Ace technical interviews at any company.

Portfolio Projects

5 GitHub repos that scream "hire me." Real products. Real code. Real impact.

Interview Mastery

20+ mock interviews. Behavioral coaching. Salary negotiation strategies.

Investment & Delivery

Program Cost

₹59,999 total

₹10,000/month × 6 months

Delivery Format

Live Online Lectures

Recorded Sessions + Q&A
